BWS/N9907: Use basic health and safety practices in neurotherapy workplace

Description

This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the neurotherapy workplace. It covers responsibilities towards self, others, assets and the environment. It includes understanding of risks and hazards in the workplace, along with basic knowledge of common first aid applications, safe practices and accident prevention methods.

Scope

The scope covers the following :

- This unit/task covers the following:
- 1. Maintain health and safety at the workplace

Elements and Performance Criteria

Maintain health and safety at the workplace

To be competent, the user/individual on the job must be able to:

1. use protective clothing/equipment in neurotherapy work (Protective clothing: appropriate footwear; lab coat; mask; gloves; headgear, apron; etc.)
2. state the name and location of people responsible for health and safety in the workplace
3. set up and position the equipment, relevant products and tools in the work area to meet legal, hygiene and safety requirements
4. clean and sterilize all tools and equipment before use
5. maintain one's posture and position to minimize fatigue and the risk of injury
6. state methods of accident prevention in the work environment of the job role
Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices; instruction from colleagues and supervisors
7. apply good housekeeping practices at all times
Good housekeeping practices: clean/tidy work areas, removal/disposal of waste, etc.
8. lift, carry or move objects from one place to another using appropriate safe working practices
9. keep oneself updated on the knowledge of the first aid procedures
10. identify and document potential risks and hazards in the workplace
11. accurately maintain accident reports
12. report health and safety risks/ hazards to concerned personnel
13. use tools, equipment and relevant products in accordance with standard operation procedures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** organizations policies and procedures to address risks and hazards
- KU2.** health and safety requirements in the organization
- KU3.** health and safety hazards commonly present in the work environment and related precautions
- KU4.** possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
- KU5.** methods of accident prevention
Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices; instruction from colleagues and supervisors
- KU6.** safe working practices when working with tools and equipment
- KU7.** importance of using protective clothing/equipment while working
- KU8.** adherence to environmental management policies
- KU9.** precautionary activities to prevent the fire accident
- KU10.** content of written accident report
- KU11.** contraindications related to wellness neurotherapy procedures
- KU12.** how to sterilize and disinfect equipment/ tools
- KU13.** manufacturers instructions related to equipment and product use and cleaning
- KU14.** knowledge of applicable legislation relating to the workplace (for example, health and safety, workplace regulations, use of relevant work equipment and tools, etc.)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document reports, task lists, and schedules with co-workers in English or local language
- GS2.** prepare clients status and progress reports where ever necessary in English or local language
- GS3.** read clients procedure recommendation card and interpret clients needs correctly
- GS4.** read about new procedures and services with regards to the scope of work and in reference to the organizations operation framework
- GS5.** question coworkers appropriately in order to clarify instructions and other issues
- GS6.** give clear instructions to coworkers, subordinates and others
- GS7.** question client appropriately in order to understand the nature of needs
- GS8.** give clear instructions related to procedures to client
- GS9.** keep clients informed about neurotherapy procedures
- GS10.** avoid using jargon, slang or acronyms when communicating with client, unless it is required
- GS11.** make appropriate decisions pertaining to the scope of work and intended work objective; span of authority; responsibility; laid down procedure and guidelines, etc.
- GS12.** plan and organize own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
- GS13.** manage cordial relationships with clients who may be in discomfort and stress
- GS14.** show empathy and follow customer centric approach during neurotherapy procedures

Qualification Pack

- GS15.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS16.** identify immediate or temporary solutions to resolve delays
- GS17.** identify sources of support that can be availed of for problem solving for various kind of problems
- GS18.** seek appropriate assistance from other sources to resolve problems
- GS19.** report problems that you cannot resolve to appropriate authority
- GS20.** identify cause and effect relations in their area of work
- GS21.** use cause and effect relations to anticipate potential problems and their solution
- GS22.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

BWS/N2301: Prepare and maintain the work area for neurotherapy procedures

Description

This unit is specifically designed to prepare learners with the required learning outcomes for carrying out preparation of the work area for neurotherapy procedures. This also includes maintaining the area in a safe and hygienic manner. The work may be done independently or together with other co-workers. He/she is responsible for own outcomes and must perform the given work in accordance with relevant health and safety guidelines.

Scope

The scope covers the following :

- This unit/task covers the following:
 - 1. Preparing the work area for procedures
 - 2. Post work activities

Elements and Performance Criteria

Preparing the work area for procedures

To be competent, the user/individual on the job must be able to:

1. use appropriate personal protective equipment and/or work attire prior to carrying out the work in line with relevant occupational health & safety guidelines (PPE: appropriate footwear; lab coat; mask; gloves; headgear, apron; etc.)
2. assess potential risks related to work and implement relevant safety measures where applicable
3. obtain tools, equipment and materials required for the procedures specified in adequate quantity and designated containers (Tools & equipment: weighing scale, height measuring instrument, procedure support stands, etc.)
4. arrange the tools in a safe and convenient manner for ease of usage during the procedure
5. confirm that the selected tools and equipment are in working order and safe to handle
6. ensure the appropriate environmental conditions for procedures at the site based on the following parameters: (Parameters: neat & tidy; good ventilation; appropriate room temperature; adequately lighted; etc.)
7. check that appropriate space requirements for each customer for the duration and type of procedure, based on the following factors: (Requirements: movement requirements of both client and the therapist, posture, height to avoid feeling of suffocation, privacy, etc.)
8. ensure that the environment is suitable for procedures of different types of clients including age, sex and purpose
9. check that the bed is set with comfortable mattress, pillows and clean linen
10. ensure any stands for support are stable, rightly positioned as per space and support requirements
11. change bed linen if soiled and after every procedure as per organisational standards

Qualification Pack

12. ensure clean towels and sanitizers are available for use as appropriate and positioned conveniently for use by customer and the therapist

Post work activities

To be competent, the user/individual on the job must be able to:

13. rearrange the beds, pillows and stands as per standard requirements post the procedure
14. leave the work area in a safe condition after completing work
15. exercise safe working practices while dealing with tools and accessories
16. follow relevant electrical safety practices whenever required
17. return all tools, materials and equipment in appropriate storage location
18. collect used materials such as foot covers, towels, work clothes, etc. and deposit in the appropriate location for laundry service
19. report any work related problems or issues to appropriate personnel in line with relevant regulatory and safety requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant health and safety requirements applicable in wellness neurotherapy
- KU2.** own job role and responsibilities and sources for information pertaining to entitlements, job role and responsibilities
- KU3.** inter-dependent functions, lines and procedures
- KU4.** who to approach for support in order to obtain work related instructions, clarifications and support
- KU5.** importance of following health, hygiene, safety and quality standards and the impact of not following the standards on consumers and the business
- KU6.** relevant people and their responsibilities within the work area
- KU7.** scope of procedures offered by the organization and related standards
- KU8.** use of appropriate personal protective equipment (PPE) required during preparing for procedures and during procedures
- KU9.** identify hazards associated with the work and adhere to relevant health and safety practices
- KU10.** comply with relevant regulations and instructions related to client procedure & management
- KU11.** range of materials used for neurotherapy procedures such as powders, etc.
- KU12.** list of tools and equipment used in neurotherapy procedures
- KU13.** importance of referring to information from reliable sources on procedures, practices and precautions
- KU14.** factors affecting safety, comfort and convenience of customers and workers in a neurotherapy lab or site
- KU15.** how to estimate space requirements for customers, procedures and other related requirements
- KU16.** importance of returning all the used tools and equipment safely to their respective storage
- KU17.** importance and methodology of positioning stands and other support equipment
- KU18.** bed and pillow settings for procedures and types of clients

Qualification Pack

- KU19.** various body postures in which procedure is given and related adjustments to pillow, bed and stand arrangements or positions including one and half setting, angles, distance, etc.
- KU20.** various emergency conditions and related procedures
- KU21.** storage places and procedures for linen and other tools, materials and equipment
- KU22.** units of measurement used in measuring height and weight e.g. kg, m, cm, m, etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clearly and legibly in English, Hindi or the local language
- GS2.** write messages and information with descriptive text using short or long sentences and a range of technical and non-technical vocabulary
- GS3.** fill relevant activity records in log books, write in local language or English, procedure given, update stock records, etc.
- GS4.** record daily activities such as customer attendance, procedure time, nature of procedure, feedback, etc.
- GS5.** document age, sex, weight of customers
- GS6.** read English, Hindi or the local language appropriate to accurately interpret customer needs and procedures on customers forms and recommendation cards
- GS7.** read safety symbols or warning messages on materials, tools & equipment used
- GS8.** read instructions of information provided in local language related to work
- GS9.** speak in English, Hindi or the local language with clarity to convey messages, basic factual information using a range of technical and non-technical vocabulary
- GS10.** can ask simple questions of a factual nature and understand answers expressed in simple language
- GS11.** inform relevant authority of issues or any or problems in work area in any language understood locally
- GS12.** take instructions completely so that no instruction is missed or misunderstood
- GS13.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS14.** use common procedure terms and technical jargon where required
- GS15.** when faced with difficult decisions, seek clarification from seniors at work
- GS16.** take decisions at work within limits to authority and decision making scope approved by organisation
- GS17.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS18.** plan and organize an efficient work environment based on customer and own comfort, procedure requirements, safety, etc.
- GS19.** display and employ empathy by understanding customer concerns and requirements regarding procedures while addressing their needs at all stages of engagement
- GS20.** provide customers with all relevant information regarding the procedure including time, requirements, processes and support available

Qualification Pack

- GS21.** ensure customer privacy and dignity is maintained at all times including considerations for appropriate levels of protection of customer information, customer attire, customer handling and manner of touch, addressing customers appropriately, etc.
- GS22.** address problems related to availability of supply of materials, tool and equipment, by seeking appropriate assistance, reporting problems to appropriate authority, making alternative arrangements within approved procedures, etc.
- GS23.** account for multiple considerations and priorities and related cause and effect impact before taking decision related to own scope of work

BWS/N2303: Assess clients needs and recommend appropriate neurotherapy procedures for increased comfort and enhanced fitness

Description

This unit is specifically designed to prepare learners with the required learning outcomes for assessing clients needs and recommending appropriate wellness neurotherapy procedure. The job duties require the incumbent to thoroughly examine relevant discomfort points in the body and identify the level of the discomfort. The job holder should be capable of recommending appropriate procedure requirements and schedule to supplement the procedure. He/she must comply with any relevant procedure restrictions while recommending neurotherapy. Any related occupational health and safety required must be fulfilled while carrying work.

Scope

The scope covers the following :

- This unit/task covers the following:
 1. Documenting client's general health history for assessment
 2. Assessing client's needs and recommending appropriate neurotherapy procedure
 3. Suggesting appropriate diet and lifestyle
 4. Activities post client's needs assessment

Elements and Performance Criteria

Documenting client's general health history for assessment

To be competent, the user/individual on the job must be able to:

1. use appropriate personal protective equipment and/or work attire prior to carrying out the work in line with relevant occupational health & safety guidelines PPE: appropriate footwear; lab coat; mask; gloves; headgear, apron; etc
2. assess potential risks related to work and implement relevant safety measures where applicable
3. sanitise hands prior to procedure using appropriate sanitizer
4. obtain tools, equipment and materials required to carry out assessment of client's well-being
Tools & equipment: sphygmomanometer, weighing scale, thermometer, height measuring instrument, etc. Materials: powder
5. confirm that the selected tools and equipment are in working order and safe to handle
6. check that the client's activity or recommendation card is duly filled with necessary information such as name & address, age, gender, blood group, height, weight, etc.
7. ensure that valid consent of the client or that of closest kin is obtained wherever necessary
8. greet the customer appropriately in a courteous manner
9. respect client's rights and wishes relating to their consent, privacy, beliefs and dignity
10. confirm past or current health history of the client and document information in the recommendation card as per organization's standard procedures
Information: e.g. complaints of medical conditions or diseases such autoimmune / inflammatory diseases, low blood pressure, heart diseases, diabetics, kidney problems, cancer, wounds, etc.; any allopathic medication; etc.

Qualification Pack

11. ensure that any references of symptoms and observations are recorded accurately in the client recommendation card
12. clarify any unusual or arbitrary information related to client's health condition as per organization's standard procedures
13. ensure that client's blood pressure and body temperature are measured using appropriate devices and techniques Assessing client's needs and recommending appropriate neurotherapy procedure

Assessing client's needs and recommending appropriate neurotherapy procedure

To be competent, the user/individual on the job must be able to:

14. politely ask the client to lie down on the examination table in correct body alignment
15. confirm if there are any injury, swelling or visual inflammation
16. check acid and alkaline balance using appropriate methods Methods: pressing ring fingers; etc
17. identify the appropriate discomfort to be checked as per client's needs Discomfort points: e.g. pan, gal, mu, liv, rt ov, spl, acid, gas l, etc.
18. use approved pressing techniques to check discomfort points and confirm the level of discomfort
19. seek client's guidance while determining the correct discomfort location and level of discomfort as per relevant organization's standard procedures
20. ensure that the client continues with any ongoing allopathic procedure
21. identify the appropriate type of procedure & schedule to be prepared in accordance with the assessment result Type of procedures: acid procedure; akali/base procedure; normal procedure; ajay normal procedure; old nabhi set procedure; vater procedure; alkali procedure; etc.
22. determine the appropriate duration and dose of neurotherapy procedure based on client's needs assessment
23. confirm that the procedure schedule consists of required specifications relevant to the client's needs assessment Specifications: type of pressing techniques to be used (e.g. feather touch or light massage, deep tissue massage); procedure to be given by hands or legs; duration; direction; number of repetitions; extent of pressure; etc
24. specify sequence in which procedure is to be given clearly in the client card as per organization's standard procedures
25. adhere to relevant procedure restrictions in wellness neurotherapy
26. confirm that procedure specifications and relevant indicators of discomfort level are documented accurately as per organization's standard procedures

Suggesting appropriate diet and lifestyle

To be competent, the user/individual on the job must be able to:

27. recommend client with general healthy lifestyle such as appropriate sleeping, eating and bathing habits, etc.
28. recommend appropriate diet, eating habits and prepare a supplementary chart
29. advise client to follow correct body posture while lying down i.e. turn sideways, fold both legs at knees and lift up legs gently
30. advise client with relevant physical exercises that can be performed at home

Activities post client's needs assessment

To be competent, the user/individual on the job must be able to:

31. leave the work area in a safe condition after completing work

Qualification Pack

32. exercise safe working practices while dealing with tools and accessories
33. follow relevant electrical safety practices whenever required
34. return all tools, material and equipment in appropriate storage location
35. collect used materials such as foot covers, towels, work clothes, etc. and deposit in the appropriate location for laundry service
36. report any work related problems or issues to appropriate personnel in linewith relevant regulatory and safety requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant health and safety requirements applicable in wellness neuro-therapy
- KU2.** own job role and responsibilities and sources for information pertaining to entitlements, job role and responsibilities
- KU3.** inter-dependent functions, lines and procedures
- KU4.** who to approach for support in order to obtain work related instructions, clarifications and support
- KU5.** importance of following health, hygiene, safety and quality standards and the impact of not following the standards on consumers and the business
- KU6.** relevant people and their responsibilities within the work area
- KU7.** scope of procedures offered by the organisation and related standards
- KU8.** use of appropriate personal protective equipment and/or work attire required prior to assessing clients needs
- KU9.** identify hazards associated with the work and adhere to relevant health and safety practices
- KU10.** comply with relevant regulations and instructions related to wellness neurotherapy procedure
- KU11.** material used in the procedure such as powder
- KU12.** list of tools and equipment used in neurotherapy procedures
- KU13.** importance of referring to information from reliable sources on procedures, practices and precautions
- KU14.** factors affecting safety, comfort and convenience of customers and workers in a neuro-therapy lab or procedure center
- KU15.** importance of collecting client past and present health history in appropriate format accurately
- KU16.** approved neurotherapy techniques used to assess clients needs
- KU17.** range of neurotherapy discomfort points in human body
- KU18.** basic anatomy and physiology of human body
- KU19.** techniques used to determine the level of discomfort points
- KU20.** different types of neurotherapy procedures
- KU21.** how to determine procedure schedule
- KU22.** composition of a schedule
- KU23.** relation between general wellness and healthy lifestyle

Qualification Pack

- KU24.** dos and donts in wellness neurotherapy procedure
- KU25.** basic knowledge of yogic exercises such as pranayama, sukshma vyayam, etc.
- KU26.** importance of returning all the used tools and equipment safely to their respective storage
- KU27.** importance and methodology of positioning stands
- KU28.** determining appropriate duration and sequence of procedure
- KU29.** various body postures in which procedure is given and related adjustments to pillow, bed and stand arrangements or positions including various emergency conditions and related procedures
- KU30.** storage places and procedures for linen and other tools, materials and equipment

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clearly and legibly in English, Hindi or the local language
- GS2.** write messages and information with descriptive text using short or long sentences and a range of technical and non-technical vocabulary related to procedure
- GS3.** fill relevant activity records in log books, clients needs assessment in procedure cards write in local language or English, procedure records, etc.
- GS4.** document clients past and present health history in recommendation cards, nature of procedure, before and after procedure results, feedback, etc.
- GS5.** document age, sex, weight, blood group, blood pressure, etc.
- GS6.** read English, Hindi or the local language to accurately interpret customer needs and recommend procedure on client recommendation cards
- GS7.** read and comprehend clients previous health report or related documents wherever necessary
- GS8.** read safety symbols on materials, tools & equipment used
- GS9.** read any instructions of information provided in English, Hindi or local language related to work
- GS10.** speak in English, Hindi or the local language with clarity to convey messages, basic factual information using a range of technical and non-technical vocabulary
- GS11.** can ask simple questions of a factual nature and understand answers expressed in simple language
- GS12.** inform relevant authority of issues or any or problems in work area in any language understood locally
- GS13.** take instructions completely so that no instruction is missed or misunderstood
- GS14.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS15.** use common procedure terms and technical jargon where required
- GS16.** when faced with difficult decisions seek clarification from immediate authority
- GS17.** take decisions at work within limits to authority and decision making scope approved by organisation
- GS18.** plan and organize own work in a way that all activities are completed in time and as per specifications

Qualification Pack

- GS19.** plan and organize an efficient work environment based on customer and own comfort, procedure requirements, safety, etc.
- GS20.** display and employ empathy by understanding client concerns and requirements regarding procedures while addressing their needs at all stages of engagement
- GS21.** provide clients with all relevant information regarding the procedure including time, requirements, processes and support available
- GS22.** ensure clients privacy and dignity are maintained at all times including considerations for appropriate levels of protection of client information, client attire, client handling and manner of touch, addressing clients appropriately, etc.
- GS23.** address problems related to availability of effective delivery of procedure, supply of materials, tool and equipment, co-operation from client, reporting problems to immediate authority, making alternative arrangements within approved procedures, etc.
- GS24.** account for multiple considerations and priorities and related cause and effect impact before taking decision related to own scope of work
- GS25.** think critically of health conditions that are beyond the scope of neurotherapy procedure and refer to concern healthcare specialists if necessary

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria.
6. To pass the Qualification Pack , every trainee should score a minimum of 70% in aggregate.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
